

ICS

Beyond Products

Integrated Collaboration, Audio Visual, Extra Low Voltage,
IP Infrastructure & Control Room Solutions

COMPANY OVERVIEW

Integrated Communications Systems (ICS) is a leading turnkey system integrator in Doha - Qatar, specializing in design, supply, integration, testing, commissioning and support of intelligent communication and workplace technologies since its inception in 2007. We help organizations to create connected, secure and collaborative environments that enhance business performance and improve user experience.

With expertise spanning Audio Visual, Unified Communications, IT Infrastructure, VSAT Communication, Physical Security, Smart Workplace and Managed Services, ICS delivers complete end-to-end technology solutions tailored to each client's operational requirements.

Whether developing a corporate headquarters, educational campus, government facility, healthcare institution, hospitality venue or mission-critical control room, our team combines engineering excellence with proven technologies to deliver reliable, scalable and future-ready solutions.

KEY PRINCIPLES

- ✓ Business-first approach
- ✓ Thoughtful engineering
- ✓ Long-term partnerships
- ✓ Reliable technology
- ✓ Regional Support
- ✓ Future Ready Solutions

LCS

VISION

To become the Middle East's most trusted technology integration partner by creating intelligent, connected and future-ready workplaces.

MISSION

To design, integrate and support innovative technology solutions that improve collaboration, operational efficiency and business performance through engineering excellence and exceptional customer service.

CORE VALUES

- ✓ Innovation
- ✓ Integrity
- ✓ Engineering Excellence
- ✓ Customer First
- ✓ Partnership
- ✓ Continuous Improvement
- ✓ Accountability
- ✓ Quality

WHY CHOOSE US

Selecting a technology integration partner is about more than technical capability. It requires confidence that every stage of the project from design through long-term support will be delivered with professionalism, consistency and attention to detail.

At **ICS**, we combine multidisciplinary engineering expertise with structured project management and customer-focused service to deliver solutions that perform reliably throughout their lifecycle.

Whether implementing a single meeting room or a large-scale enterprise deployment, our objective remains the same create technology environments that are simple to use, easy to manage and built for the future.

WHY CLIENTS CHOOSE US

- ✓ End-to-End System Integration
- ✓ Experienced Engineering Team
- ✓ Vendor-Neutral Technology
- ✓ Tailored Solution Design
- ✓ Professional Project Delivery
- ✓ Comprehensive Documentation
- ✓ User Training & Knowledge Transfer
- ✓ Preventive Maintenance & Technical Support

LCS

INDUSTRIES WE SERVE

Every industry has unique operational requirements, compliance standards and user expectations. Our solutions are designed to support the way people communicate, collaborate and work within each environment.

Government

Defense & Security

Corporate Offices

Banking & Financial

Oil & Gas

Education

Healthcare

Hospitality

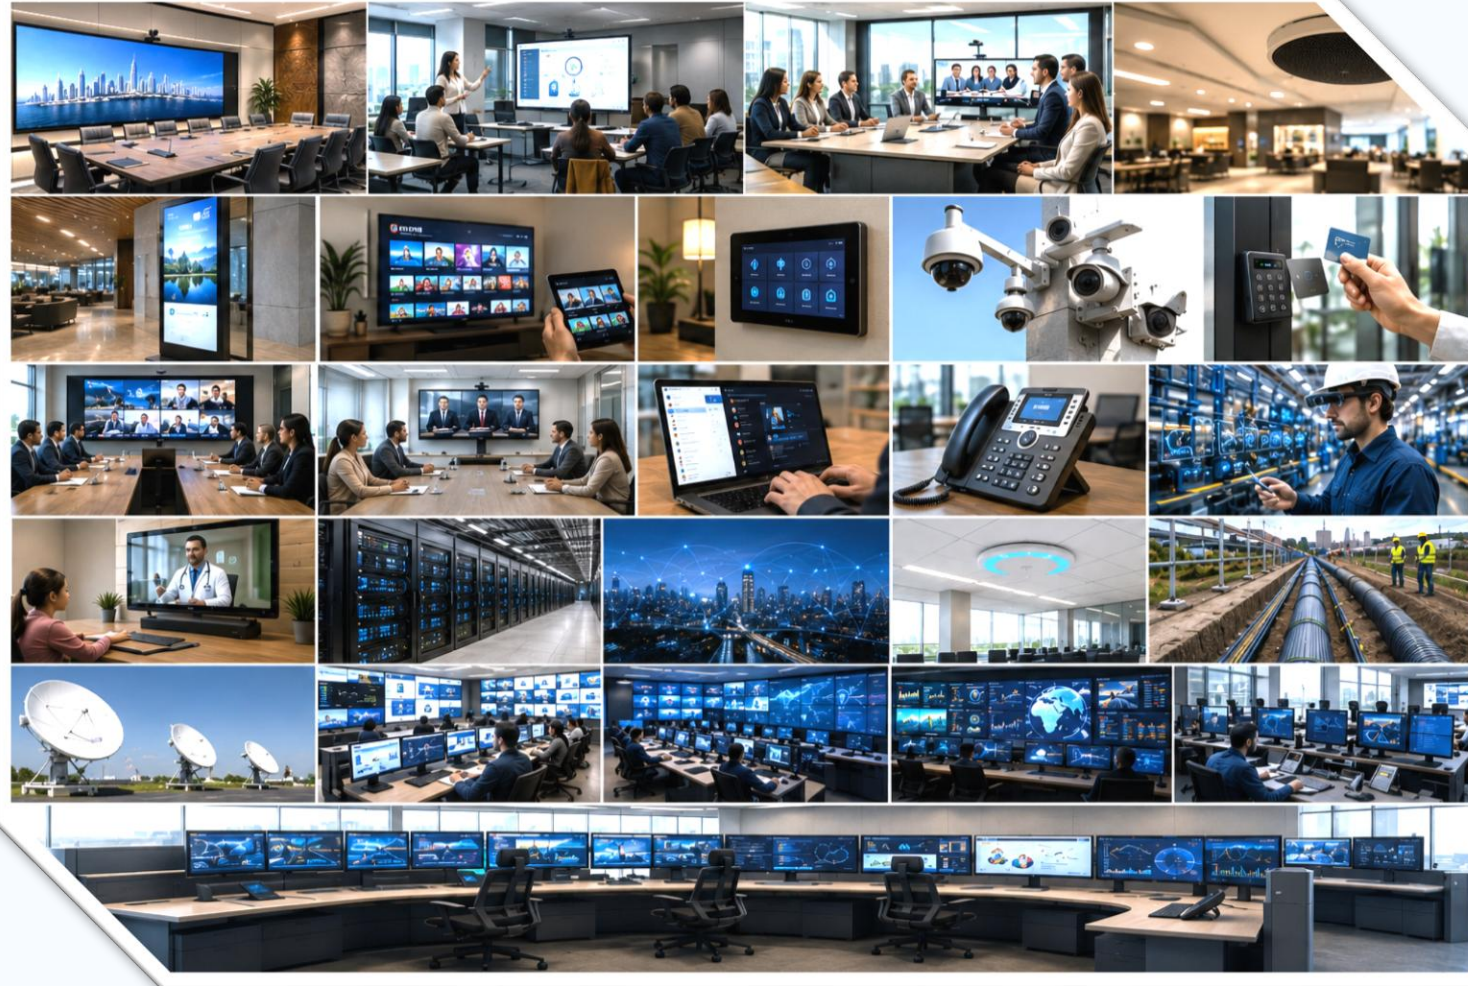

Retail

LCS

SOLUTIONS WE PROVIDE

Professional Audio Visual & Extra Low Voltage

- Professional Displays & Projections
- Interactive & Learning Technologies
- Digital Conferencing Solutions
- Background Music (BGM)
- Digital Signage
- IPTV, Streaming and Recording
- Automation & Control
- CCTV
- Access Control

Unified Communication & Collaboration (UCC)

- Video Conferencing & Telepresence
- Unified Communication Applications
- IP Telephony / Call Control
- Industrial Augmented Reality Services
- Distance Learning & Telemedicine

IP Infrastructure

- LAN / WAN
- Wired & Wireless Communication
- Indoor/Outdoor Fiber Cabling & Structured Cabling
- VSAT & IP based satellite communication system

Command & Control Center

- Networked SOC's
- Pro Visualization and Video Walls
- Operators Networked Workspace
- Technical Furniture of Control Centers (ISO 11064)

SERVICES WE DO

ICS, delivers complete services including scope assessment, system design, material supply, installation, configuration, testing, commissioning and annual maintenance, helping organizations achieve seamless technology integration and long-term operational excellence.

 SCOPE ASSESSMENT	 SYSTEM DESIGN
 MATERIAL SUPPLY	 INSTALLATION & CONFIGURATION
 TESTING & COMMISSIONING	 ANNUAL MAINTENANCE

BRANDS WE DEAL

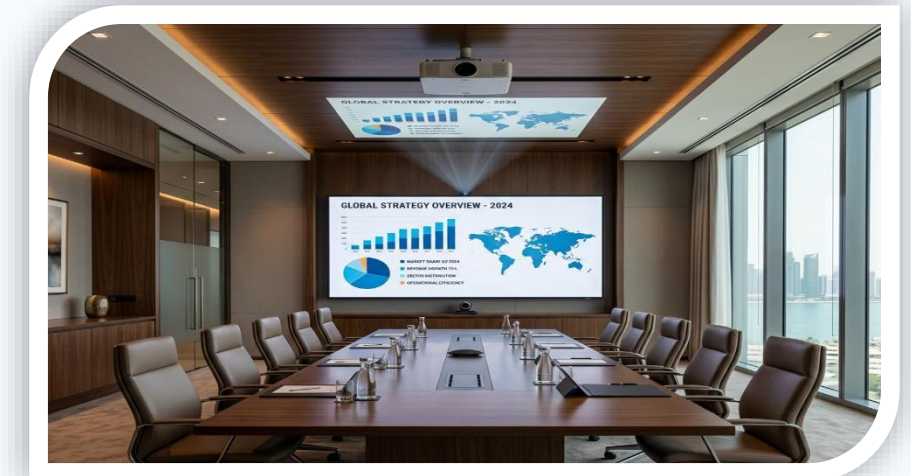

Explore some of the ecosystem of leading brands that support our projects, enabling us to deliver innovative, reliable and future-ready technology solutions across diverse business environments.

Professional Audio Visual & Extra Low Voltage (AV & ELV)

Professional Displays & Projection

Deliver crystal-clear visual communication through professional displays and projection systems designed for boardrooms, auditoriums, classrooms and presentation spaces, ensuring outstanding image quality, reliability and audience engagement.

Interactive & Learning Technologies

Create engaging learning environments with interactive displays and collaborative technologies that encourage participation, simplify knowledge sharing and enhance classroom, training and meeting experiences.

Digital Conferencing Solutions

Enable seamless hybrid meetings with intelligent conferencing solutions that deliver exceptional audio, video and content sharing for productive collaboration across meeting rooms and remote locations.

Professional Audio Visual & Extra Low Voltage (AV & ELV)

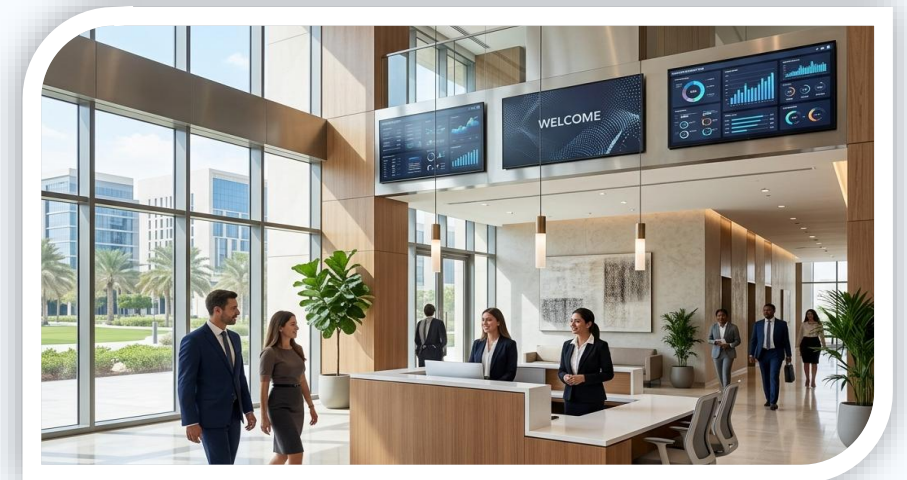

Background Music (BGM)

Enhance customer experiences with professionally designed background music systems that deliver consistent, high-quality audio across hospitality, retail, commercial and public environments.

Digital Signage

Deliver dynamic visual communication through centrally managed digital signage solutions that improve information sharing, customer engagement and brand visibility across commercial environments.

IPTV, Streaming & Recording

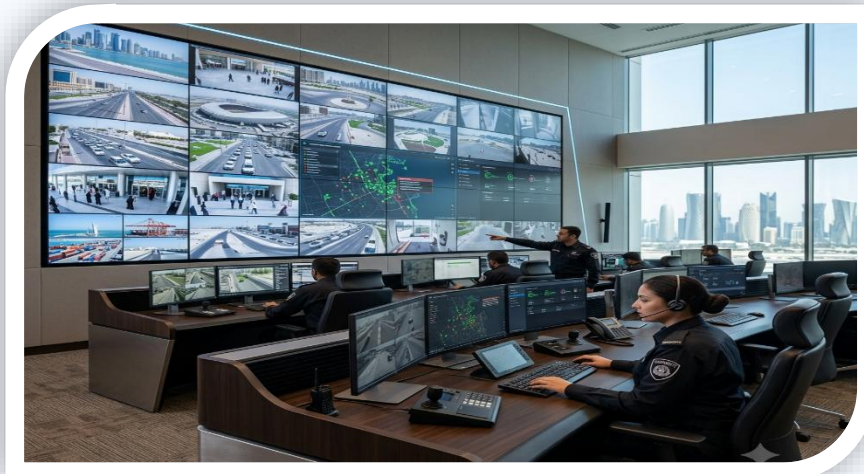

Distribute, stream and record live or on-demand content securely across enterprise networks, supporting training, corporate communications, events and knowledge sharing.

Professional Audio Visual & Extra Low Voltage (AV & ELV)

Automation & Control

Simplify technology management through intelligent automation and control systems that operate multiple devices from a single intuitive interface, improving efficiency and user experience.

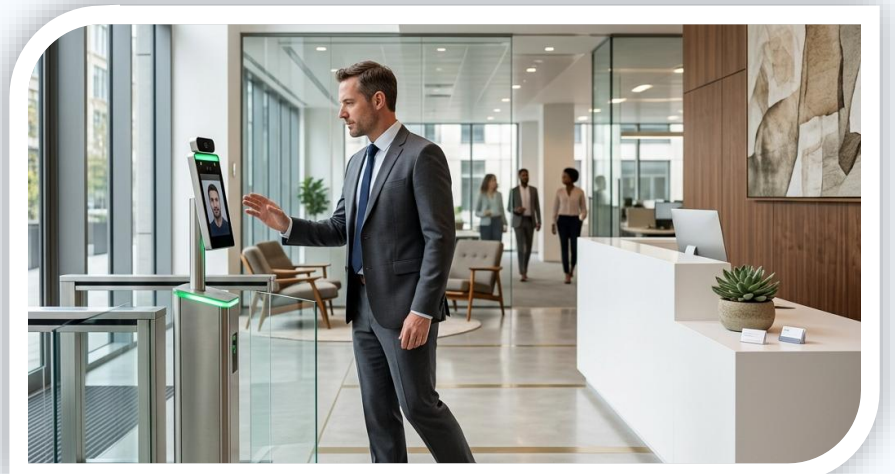

CCTV

Improve safety and operational awareness with intelligent CCTV solutions providing continuous monitoring, high-definition surveillance and centralized video management for commercial and critical facilities.

Access Control

Protect people and facilities with intelligent access control systems using smart credentials, biometric authentication and centralized management for secure, controlled entry.

Unified Communication & Collaboration (UCC)

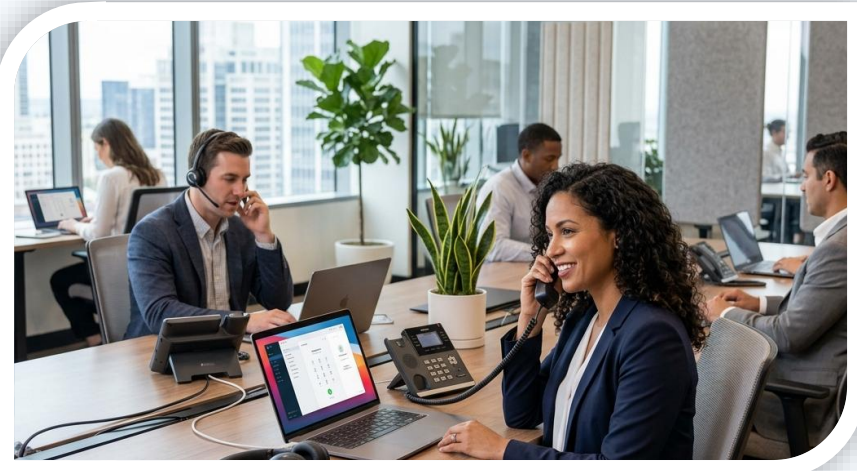

Video Conferencing & Telepresence

Connect teams across locations with immersive video conferencing and telepresence solutions that deliver natural communication, high-quality collaboration and productive meetings in every workspace.

Unified Communications Applications

Integrate voice, video, messaging and collaboration into a single platform, enabling employees to communicate efficiently across desktops, mobile devices and meeting spaces.

IP Telephony / Call Control

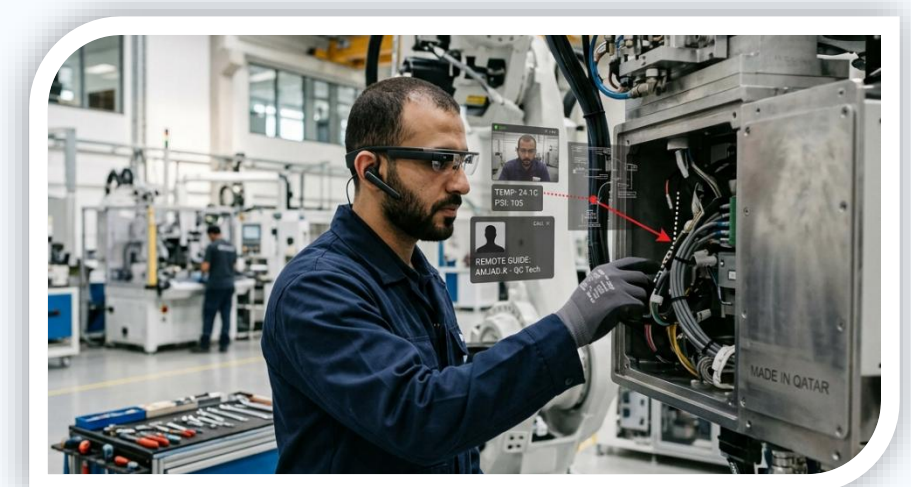

Deploy enterprise IP telephony and call control solutions that provide reliable voice communications, centralized management and seamless connectivity across multi-site organizations.

Unified Communication & Collaboration (UCC)

Industrial Augmented Reality Services

Improve remote assistance, maintenance and field operations through industrial augmented reality solutions that enable real-time collaboration, expert guidance and faster problem resolution.

Distance Learning & Telemedicine

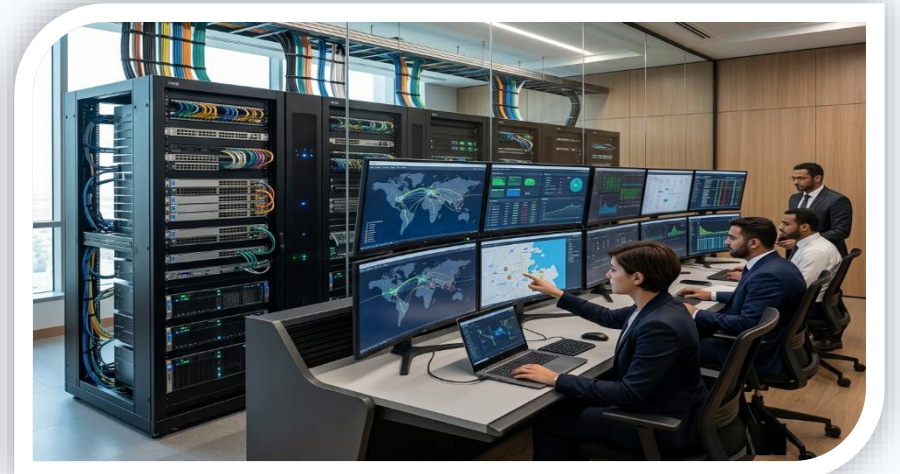

Support remote education and healthcare with secure, high-quality communication platforms that enable virtual learning, specialist consultations and real-time knowledge sharing from anywhere.

IP Infrastructure

LAN / WAN

Design and deploy high-performance Local and Wide Area Networks that deliver secure, reliable and scalable connectivity between offices, data centers and remote locations for seamless business operations.

Wired & Wireless Communication

Provide secure, high-speed wired & wireless connectivity that enables seamless communication, mobility and uninterrupted access across corporate offices, campuses, hospitality venues and public spaces.

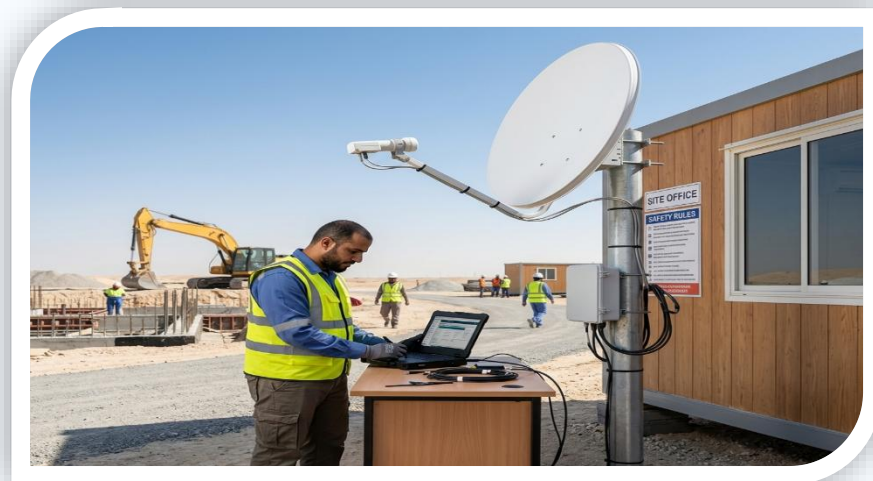

Indoor/Outdoor Fiber Cabling & Structured Cabling

Implement durable outdoor fiber optic infrastructure that delivers high-capacity, long-distance connectivity with exceptional reliability for campuses, industrial facilities and metropolitan networks.

IP Infrastructure

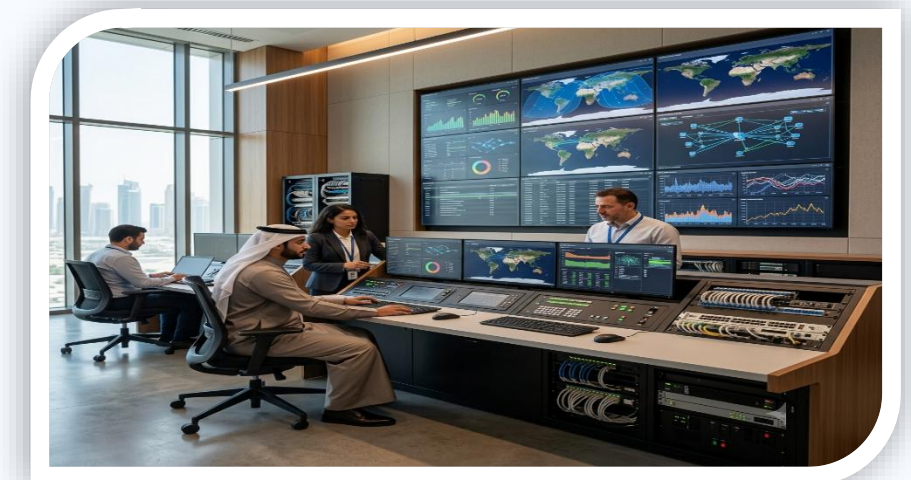

VSAT (Very Small Aperture Terminal)

Provide reliable broadband connectivity using VSAT terminals for remote offices, construction sites, offshore facilities and temporary locations where terrestrial networks are unavailable, ensuring uninterrupted voice, video and data communications.

IP-Based Satellite Communication System

Design and integrate enterprise IP-based satellite communication networks that securely transport voice, video and data between geographically dispersed sites, supporting business continuity, critical operations and global connectivity through centralized network management.

Command & Control Center

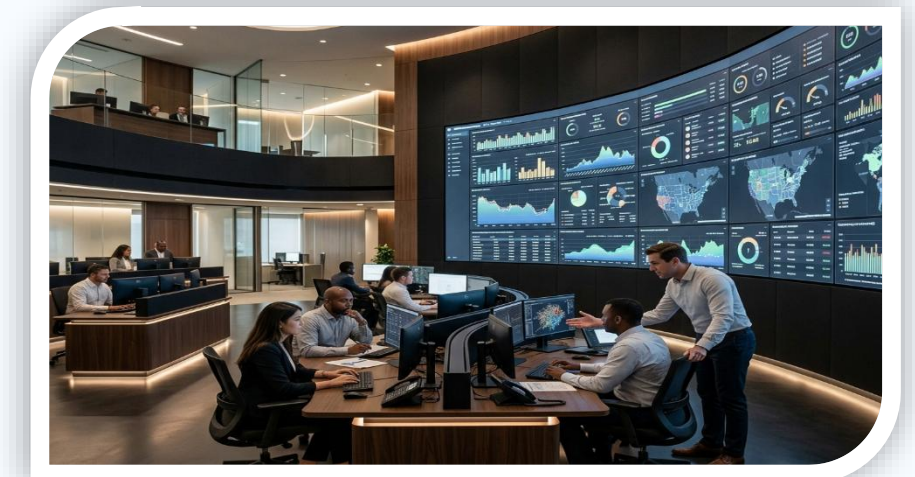

Networked Security Operations Centers (SOCs)

Enable centralized cybersecurity monitoring with networked Security Operations Centers that provide real-time threat detection, incident response and continuous protection across enterprise and critical infrastructure environments.

Professional Visualization & Video Walls

Deliver impactful visual experiences with professional video walls and visualization solutions that enhance monitoring, collaboration and decision-making across command centers, corporate environments and public spaces.

Operators Networked Workspace

Create ergonomic operator workspaces with integrated communication, visualization and control technologies that improve situational awareness, collaboration and operational efficiency in mission-critical environments.

Command & Control Center

Technical Furniture for Control Centers

Provide purpose-built technical furniture designed for control rooms, offering ergonomic comfort, efficient equipment integration and long-term reliability for continuous operational environments.
